

Application No. 10/670,379  
Supplemental Amendment dated June 1, 2007  
Reply to Office Action of January 5, 2007

Docket No.: 0465-1035P

**REMARKS**

This Reply is supplemental to the Amendment filed on April 2, 2007.

Claims 1, 4-5, 8, 10-13, 23-24, 26, 32-33, 36-37, 45, 48-49 and 52-58 are pending in the present application. By this reply, new claim 58 has been added. Claims 1, 26, 48 and 58 are independent.

The claims have been amended to clarify the invention and to correct minor informalities according to U.S. patent practice. These modifications do not add new matter.

**Interview Conducted & New Claim**

Applicants appreciate the Examiner for the personal interview conducted with Applicants' representative on May 24, 2007 and for the Interview Summary.

Without acquiescing to the Examiner's allegations made in the last Office Action to reject the claims, but to advance prosecution only, independent claims 1, 26 and 48 have now been amended to recite "a start position of a respective recording unit" (emphasis added) to further define over the prior art including Takahashi, as discussed during the interview. Accordingly, independent claims 1, 26 and 48 and their dependent claims (due to the dependency) are allowable.

New claim 58 recites, *inter alia*, "recording at least two temporary defect list pointers as position information indicating respectively positions of at least two recording units in the temporary defect list in the temporary defect management area" (emphasis added). This feature was also discussed during the interview as one of the distinguishing features of the present invention over the prior art including Takahashi. Thus, allowance of claim 58 is respectfully requested and deemed proper.

**35 U.S.C. § 102 and § 103 Rejections**

Claims 1 4-5, 9-14, 17-18, 21-22, 25-29, 32-33, 36-38 and 46-51 remain rejected under 35 U.S.C. § 102(e) as being anticipated by Takahashi (US2006/0077827). Claims 2-3, 6-7, 15-16, 19-20, 30-31, 34-35 and 39-44 remain rejected under 35 U.S.C. § 103(a) as being

unpatentable over Takahashi in view of Martens (US2005/0083830). These rejections are respectfully traversed.

As pointed out by Applicants' representative during the interview, Takahashi does not teach or suggest a temporary defect management area, but a conventional defect management area. Further, in Takahashi, the pointer (e.g., 4B) points to the start position of a defect management area (not a temporary defect management area), whereas in Applicants' invention, the pointer indicates a start position of a respective recording unit in the temporary defect list as claimed. In view of the above amendments to each independent claim which was discussed during the Interview as overcoming Takahashi, independent claims 1, 26 and 48 and their dependent claims (due to the dependency) are patentable over the applied reference(s), and the rejections should be withdrawn.
